New Record of Staphylinid Beetles (Coleoptera) from Yoron-tô Island of the Ryukyus, Japan

Yasuaki WATANABE

Laboratory of Entomology, Tokyo University of Agriculture,
Setagaya, Tokyo, 156–8502 Japan

and

Shigeru ONODA

Higashikoorimoto-cho 11–16, Kagoshima-shi, 890–0084 Japan

Until now, no staphylinid beetle has been reported from Yoron-tô Island of the Ryukyus, Japan. One of the authors, S. ONODA, had an opportunity of making a faunal investigation of soil insects on Yoron-tô Island of the Ryukyus. He was able to obtain four species of staphylinid beetles at Kurohana of the island on September 13, 1996. They are as recorded below.

1. *Philonthus aeneipennis* BOHEMAN, 1 ♀.
2. *Philonthus amicus* SHARP, 1 ♀.
3. *Philonthus discoideus* GRAVENHORST, 2 ♀♀.
4. *Aleochara (Xenochroa) puberula* KLUG, 1 ♀.
