Shioji-chô, Nagoya, 467-8610 Japan

On August 7, 1999, we had fortunately an opportunity to visit and to collect insects on Is. Ohgami-shima. This is a small islet (about 750 m in length), lying about 4.5 km northeast of Shimajiri on Is. Miyako-jima, the Ryukyus. So far as we are aware, the coleopteran fauna of the island has never been recorded until now. The species collected are as listed below.

Cicindelidae	<i>Cicindela yuasai okinawensis</i> HORI et CASSOLA
Dytiscidae	<i>Copelatus andamanicus</i> RÉGIMBART
Hydrophilidae	<i>Coelostoma stultum</i> (WALKER)
Scarabaeidae	<i>Protaetia pryeri nitidicosta</i> YAHATA
Limnichidae	<i>Babalimnichus masamii</i> M. SATÔ
Elateridae	<i>Abelater satoi</i> (ÔHIRA)
Ciidae	<i>Octotemnus laminifrons</i> (MOTSCHULSKY)
Tenebrionidae	<i>Diphyrrynchus iriomotensis</i> M. T. CHÛJÔ; <i>D. shibatai</i> KASZAB <i>Nesocaedius minimus</i> (M. T. CHÛJÔ) <i>Trachyscelis chinensis</i> CHAMPION <i>Platydema subfascia</i> (WALKER) <i>Ceropria induta</i> (WIEDEMANN) <i>Pentaphyllus dilatipes</i> SHIBATA; <i>P. philippinensis</i> KASZAB <i>Hypophloeus amamiensis</i> KASZAB <i>Eurohemicerca sakishimensis</i> (M. T. CHÛJÔ)
Elacatidae	<i>Elacatis atrithorax</i> PIC
Cerambycidae	<i>Mesosa praelongipes</i> KUSAMA et IRIE <i>Bumetopia oscitans sakishimana</i> HAYASHI <i>Sybra pascoei</i> LAMEERE; <i>S. orbinata miyakojimana</i> HAYASHI <i>Ropica caenosa</i> (MATSUSHITA); <i>R. honesta</i> PASCOE <i>Pterolophia annulata</i> (CHEVROLAT)
