Until now, 2 species of the Noteridae, 3 species of the Dytiscidae and 3 species of the Hydrophilidae, which are indicated by asterisks, have been recorded from the Island of Ikema-jima of the Ryukyus. In 1998 and 1999, we had opportunities to visit the island and to collect insects. The aquatic Coleoptera collected are as listed below. Their collecting data are as follows: July 18–Aug. 3, 1998 (A), Dec. 17–29, 1998 (B), Mar. 5–17, 1999 (C) and July 30–Aug. 9, 1999 (D).
