 Tokyo, 102-8357 Japan

We have been studying edible beetles from northern Thailand and published our papers in the *Elytra, Tokyo* (1998, **26**: 443-445; 1999, **27**: 191-198). In addition, we have collected and determined some more species as given below:

#### Family Scarabaeidae

##### Laparosticti

*Onthophagus (Serrophorus) seniculus* (FABRICIUS)

##### Pleurosticti

<i>Anomala parallera</i> BENDERITTER	<i>A. blaisei</i> OHAUS
--------------------------------------	-------------------------

<i>A. cantori</i> HOPE	<i>A. fusikibia</i> LIN
------------------------	-------------------------

<i>A. rugosa</i> ARROW	<i>Mimela ignistriata</i> LIN
------------------------	-------------------------------

<i>A. punctulicollis</i> FAIRMAIRE	<i>Empectida tonkinensis</i> MOSER
------------------------------------	------------------------------------

We wish to express our gratitude to Messers. Kaoru WADA, Joetsu Educational University and Takeshi ITOH of Osaka City for taking trouble to determine the above species.
