

Occurrence of *Psephenus hermani* Y. WATANABE
(Coleoptera, Staphylinidae) on the Island of
Mikura-jima of the Izu Islands, Central Japan

Yasuaki WATANABE

Laboratory of Insect Resources, Tokyo University of Agriculture,
Atsugi, Kanagawa, 243-0034 Japan

Until now, 41 species of staphylinid beetles were recorded from the Island of Mikura-jima of the Izu Islands by WATANABE (1961, p. 348; 1962, p. 78), SAWADA and WATANABE (1969, pp. 22–24), and WATANABE and HASEGAWA (1983, p. 4).

Through the courtesy of Mr. Keiichi MATSUMOTO, Tokyo, I had an opportunity to examine a species of staphylinid beetles obtained on the Island of Mikura-jima of the Izu Islands. It agrees with *Psephenus hermani* Y. WATANABE (1991, p. 43), which is new to the fauna of this island. It is recorded below with the collecting data.

2♂♂, 4♀♀, Mikurajima-ôhashi, Sato, Mikura-jima Is., Izu Isls., Central Japan, 16-V-1999, Keiichi MATSUMOTO leg.

I thank Mr. K. MATSUMOTO for his kindness in giving me the specimens.
