## New Records of Staphylinid Beetles (Coleoptera) from Nii-jima Island of the Izu Islands, Central Japan

Yasuaki WATANABE

Laboratory of Insect Resources, Tokyo University of Agriculture,  
Atsugi, Kanagawa, 243-0034 Japan

No staphylinid beetles have hitherto been recorded from Nii-jima Island of the Izu Islands, Central Japan. Through the courtesy of Dr. Ienori FUJIYAMA, Wakô-shi, three species of staphylinid beetles were given to me for study. They were obtained by himself on July 23, 1974, at Honson on the island. All the species are new to the fauna of the island, as recorded below.

1. *Lithocharis nigriceps* KRAATZ, 1 ♂.
2. *Philonthus lewisius* SHARP, 1 ♂, 3 ♀.
3. *Philonthus amicus* SHARP, 1 ♀.

I thank Dr. I. FUJIYAMA for his kindness in giving me the specimens.
