

## Two Unrecorded Cerambycids (Coleoptera, Cerambycidae) from Otôto-jima of the Ogasawara Islands

**Tatsuya NIISATO<sup>1)</sup> and Haruki KARUBE<sup>2)</sup>**

<sup>1)</sup> Bioindicator Co., Ltd., Yarai-chô 126, Shinjuku-ku, Tokyo, 162-0805 Japan.

<sup>2)</sup> Kanagawa Prefectural Museum of Natural History, 499, Iryuda,  
Odawara, Kanagawa, 250-0031 Japan.

Two unrecorded cerambycid beetles, *Ceresium simile simile* GAHAN and *Mesosa (Mesosa) rufa* (BREUNING), were collected by the recent survey of the junior author, KARUBE, from Otôto-jima Island of the Chichi-jima group of the Ogasawara Islands. It has been expected that such cerambycids would occur on Otôto-jima Island, since both the species are common in the main island of Chichi-jima.

### *Ceresium simile simile* GAHAN, 1890

*Specimen examined.* 1♂, Otôto-jima Is., Chichi-jima group of Ogasawara Islands, 26-VI-2001, H. KARUBE leg.

*Distribution.* Chichi-jima Is., Otôto-jima Is. (new record) (Chichi-jima group); Haha-jima Is. (Haha-jima group).

### *Mesosa (Mesosa) rufa* (BREUNING, 1935)

*Specimen examined.* 1♀, Otôto-jima Is., Chichi-jima group of Ogasawara Islands, 26-VI-2001, H. KARUBE leg.

*Distribution.* Muko-jima Is. (Muko-jima group); Chichi-jima Is., Otôto-jima Is. (new record), Higashi-jima Is. (Chichi-jima group); Haha-jima Is. (Haha-jima group).
