

Akinobu HABU in his fifties

In Memoriam Akinobu HABU  
(22 June 1920 – 28 June 2008)

**Shun-Ichi UENO**  
Chief Editor  
Japanese Society of Coleopterology

Dr. Akinobu HABU, one of the most eminent Japanese researchers in the ground beetle taxonomy, died of senility on June 28, 2008 at the age of 88.

HABU was born on June 22, 1920, and after finishing a junior high school, he went to Tokyo Imperial College of Agriculture and Forestry. On graduating from the college in March 1941, he was employed by the entomological laboratory at the Central Agricultural Experiment Station of the Ministry of Agriculture and Forestry. At that time, he was already interested in ground beetles, and published his first paper on the subject in that September (cf. No. 1 of the attached bibliography).

In July 1947, he moved to the Ôita Agricultural Improvement Station of the same ministry, then to the Hikosan Biological Laboratory of Kyushu University in May 1948 and studied there until March 1953 under the supervision of Professors Teiso ESAKI and Keizô YASUMATSU. He learned many things in this period, and started to publish the results of his studies.

On March 25, 1953, HABU settled down in his new office at the Laboratory of Insect Identification and Taxonomy of the National Institute of Agricultural Sciences, Tokyo, and steadily worked thereafter on ground beetles until his retirement on June 21, 1981. From this laboratory, he produced more than 200 academic papers including four massive monographs (cf. Nos. 96, 116, 147 and 179 of Bibliography) in about thirty years. Many of them were concerned with ground beetles excluding the members of the tribe Carabini, and formed the most important foundation for younger students who had an intention to follow his lead. He also published some papers dealing with chalcidid flies, which were his second speciality. His works were invariably accompanied by precise illustrations carefully drawn by himself. No other Japanese coleopterologists can compete with him in preparing so many fine habitus sketches.

HABU'S attitude towards classification of carabid beetles was rather conservative, especially for their higher system. This was probably, at least partly, due to his insufficiency of field observation. He seldom went out to remote places for collecting ground beetles even in his home country, and never planned expeditions to foreign countries. Instead, he sat at his desk every day, looking at his favourite insects through his microscope. On the other hand, he willingly granted requests of identification of specimens collected by other parties, not only in Japan but also in many parts of the Asian Continent. Replying to my advice, he once told me that he was so busy for clarifying morphological problems that he could not find time to broaden his studies into the fields of ecology and biogeography. In July, 1960, HABU was given a doctor's degree by Hokkaido University, not for his works on ground beetles but for his revision of chalcidid flies (cf. No. 96 of Bibliography). Twenty years later, on June 21, 1981, HABU retired from the Division of Entomology of the National Institute of Agricultural Sciences, and at the same time, quitted all his studies on ground beetles and other living things.

I first became acquainted with HABU in the 1950's just after the publication of his paper on blind cavernicolous carabids, the first contribution to the cave beetle fauna of Japan (cf. No. 8 of Bibliography). Seeing that I was most deeply interested in the subfamily Trechinae of the Carabidae, he handed over the whole study on the subfamily to me and promoted its progressive development. After I moved from Kyoto to Tokyo in 1962, he sometimes came to see me at my office in the National Science Museum for examining our collection and for talking about ground beetles, though he seldom visited other coleopterologists' offices or laboratories. I miss him heartily and wish if he could continue his studies on carabid beetles for a longer period.

In closing this obituary, I wish to express my hearty thanks to Ms. Isoko HATTORI, former chief of the Laboratory of Insect Taxonomy of the National Institute of Agricultural Sciences, for her kind help in checking up HABU'S background and to Professor Masao OHNO for finding out correct dates of issue of certain old journals.

## 1954

18. On four new species of *Trichotichnus* from Mt. Hiko, Kyushu (Coleoptera). (The Carabidae-fauna of Mt. Hiko, II). *Mushi, Fukuoka*, **26**: 53–59, pls. 5–6. [15. III. 1954.]
19. On *Somotrichus unifasciatus* DEJEAN (Coleoptera, Carabidae) from Okinawa Island. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 229–231. (In Japanese, with English résumé.) [31. III. 1954.]  
沖繩で採集された *Somotrichus unifasciatus* DEJEAN. 農業技術研究所報告, (C), (4): 229–231.
20. Some new species of Carabidae (Coleoptera) sent to the author by Mr. K. SHIRAHATA. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 233–243. [31. III. 1954.]
21. Species of the genus *Trichotichnus* (Coleoptera, Carabidae) from Mt. Hiko, Kyushu. (The Carabidae-fauna of Mt. Hiko, VI). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 245–262, pl. 1. [31. III. 1954.]
22. On *Trephionus ôtuboi* HABU (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 263–279. [31. III. 1954.]
23. Descriptions of some new carabid-beetles (Coleoptera) from Japan. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 281–294. [31. III. 1954.]
24. Species of the genus *Agonum* (Coleoptera, Carabidae) and its allied genera from Mt. Hiko, Kyushu. (The Carabidae-fauna of Mt. Hiko, V). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (4): 295–337, pls. 1–3. [31. III. 1954.]
25. Two new and one rare *Agonum*-species preserved in the collection of the Entomological Laboratory of Kyushu University (Coleoptera, Carabidae). *Kontyû, Tokyo*, **22**: 17–22. [25. XII. 1954.]
26. On the two carabid species hitherto unrecorded from Japan. *Shin Konchû, Tokyo*, **8**(1): 26–27. (In Japanese.) [25. XII. 1954.]  
我が国より未記録のゴミムシ 2 種について. 新昆虫, **8**(1): 26–27.

## 1955

27. A new subgenus and two new species of the tribe Bembidiini. (The Carabidae-fauna of Mt. Hiko, III). *Mushi, Fukuoka*, **28**: 43–47, pl. 7. (Coauthored with S.-I. UÉNO; [30. III. 1955.]
28. *Armatocillenus* (*Novicillenus* nov.) *aestuarii* S. UÉNO et HABU, sp. nov. In UÉNO, S.-I., Studies on the Japanese Trechinae (III) (Coleoptera, Harpalidae), *Publ. Seto mar. biol. Lab., Shirahama*, **4**: 337–351. [Co-authored with S.-I. UÉNO; 30. V. 1955.]
29. One new species of *Synuchus* (Coleoptera, Carabidae) from Northwest India. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (5): 139–142. [20. VI. 1955.]
30. Über die *Pterostichus*-Arten vom Berg Hiko. (Die Carabidenfauna vom Berg Hiko, VII). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (5): 143–156. [20. VI.

1955.]

31. Synonymical [sic] notes on my studies in Bull. Nat. Inst. Agr. Sci., C, No. 4 (1954). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (5): 156. [20. VI. 1955.]
32. Notes and descriptions of the *Calathus* species (Coleoptera, Carabidae) from Japan, [including "The Carabidae-fauna of Mt. Hiko, VIII"]. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (5): 157–224. [20. VI. 1955.]
33. On two species of Carabidae from Mt. Hiko (Coleoptera). (The Carabidae-fauna of Mt. Hiko, IV). *Ins. Matsum., Sapporo*, **19**: 35–39. [30. VI. 1955.]
34. One new *Agonum* species from Amami-Oshima preserved in the collection of Kyushu University. *Kontyû, Tokyo*, **23**: 111–112. [30. VI. 1955.]
35. A new *Trichotichnus*-species from South Japan. *Akitu, Kyoto*, **4**: 66–68. [Co-authored with T. NAKANE; 30. IX. 1955.]
36. On two new species of *Colpodes* from Mt. Raizan, Kyushu (Coleoptera, Carabidae). *Kontyû, Tokyo*, **23**: 155–157. [30. IX. 1955.]

## 1956

37. Eine neue *Bembidion*-Art aus Japan. *Akitu, Kyoto*, **5**: 87–90. [23. IX. 1956.]
38. On the species of *Eucalathus* from Japan and additional notes on the study of *Calathus* species from Japan. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (6): 35–48. [31. VII. 1956.]
39. On the species of *Diplocheila* (Coleoptera, Carabidae) and its allied genera of Japan. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (6): 49–73. [31. VII. 1956.]
40. On the genera and species of the Oodini (Coleoptera, Carabidae) from Japan. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (6): 75–101. [31. VII. 1956.]
41. A new species of *Agonum*, with some notes on the genus *Agonum* and its subgeneric divisions (Coleoptera, Carabidae). *Kontyû, Tokyo*, **24**: 166–169. [5. VIII. 1956.]
42. One new *Nebria* species from Mt. Hiko, Kyushu. (The Carabidae-fauna of Mt. Hiko, IX). *Kontyû, Tokyo*, **24**: 170–173. [5. VIII. 1956.]

## 1957

43. One new species of the genus *Pterostichus* (Coleoptera, Carabidae). *Kontyû, Tokyo*, **25**: 22–24. [1. II. 1957.]
44. Eine neue *Lebia*-Art (Coleoptera, Carabidae). *Kontyû, Tokyo*, **25**: 25–29. [1. II. 1957.]
45. On three carabid-beetles hitherto unrecorded from Japan. *Akitu, Kyoto*, **6**: 15–20. (In Japanese, with English title.) [11. II. 1957.]

## 1958

57. Study on the species of the subgenus *Rhagadus* of *Pterostichus* from Japan (Coleoptera, Carabidae). *Mushi, Fukuoka*, **31**: 1–13. [25. II. 1958.]
58. On a species of *Clivina* from North China (Coleoptera, Carabidae). *Kontyû, Tokyo*, **26**: 2–4. [28. II. 1958.]
59. On a species of *Agonum* from Mt. Hiko, Kyushu. (The Carabidae-fauna of Mt. Hiko, XI). *Kontyû, Tokyo*, **26**: 5–6. [28. II. 1958.]
60. One new *Bembidion*-species from North Japan (Col., Carabidae). *Kontyû, Tokyo*, **26**: 66–67. [30. IV. 1958.]
61. Three new species of the genus *Pterostichus* from Japan (Coleoptera, Carabidae). *Kontyû, Tokyo*, **26**: 68–75. [30. IV. 1958.]
62. On *Pterostichus (Bothriopterus) oblongopunctatus* FABRICIUS from Japan (Coleoptera, Carabidae). *Akitu, Kyoto*, **7**: 28–30. [Co-authored with K. BABA; 20.

VIII. 1958.]

63. On subgenus *Hikosanoagonum* and its allied new subgenus of *Agonum* (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (10): 45–54. [30. VIII. 1958.]
64. Arten der Untergattung *Plataphodes* GANGLBAUER von *Bembidion* aus Japan (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (10): 55–66. [30. VIII. 1958.]
65. Genus *Nippononebria* and its species (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (10): 67–81. [30. VIII. 1958.]
66. Study on the *Dromius*-species of Japan (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (10): 83–101. [30. VIII. 1958.]
67. Carabid-beetles feeding on leafhoppers. *Kontyû, Tokyo*, **26**: 160. (In Japanese.) [3. X. 1958.]  
ウンカを食べるゴミムシ. 昆虫, 東京, **26**: 160.
68. Description of one new *Pterostichus*-species from Niigata Prefecture, Japan (Col., Carabidae). *Akitu, Kyoto*, **7**: 71–74. [Co-authored with K. BABA; 1. XII. 1958.]
69. Additional notes on the study of the Oodini from Japan (Coleoptera, Carabidae). *Kontyû, Tokyo*, **26**: 191–194. [10. XII. 1958.]

### 1959

70. Carabidae. In: *Enumeratio Insectorum Montis Hikosan*. II. Coleoptera, 1–9. Hikosan Laboratorium Biologicum Universitatis Kyushuensis, Hikosan. (In Japanese, with Latin title.) [20. VI. 1959.]

71. New species collected by Professor M. CHÛJÔ on Mt. Tsurugiyama in Shikoku, Japan (Coleoptera, Carabidae). *Kontyû, Tokyo*, **27**: 126–133. [30. VI. 1959.]
72. List of the Chalcididae collected by Mr. K. SATO in Korea. *Kontyû, Tokyo*, **27**: 133. (In Japanese.) [30. VI. 1959.]  
佐藤 覚氏採集の朝鮮のアシプトコバチ. 昆虫, 東京, **27**: 133.
73. On two species of the genus *Agonum* from Japan (Coleoptera, Carabidae). *Kontyû, Tokyo*, **27**: 221–223. [30. IX. 1959.]
74. List of the Carabidae (Coleoptera) in Tsushima Island, Japan, including the description of a new species. *Akitu, Kyoto*, **8**: 77–82. [Co-authored with K. BABA; 9. XII. 1959.]
75. One new species of *Bembidion* from Hokkaido (Coleoptera, Carabidae). *Kontyû, Tokyo*, **27**: 257–259. [30. XII. 1959.]
76. Synonymical notes. *Kontyû, Tokyo*, **27**: 259. [30. XII. 1959.]
77. A new species of *Amara* from Japan (Coleoptera, Carabidae). *Kontyû, Tokyo*, **27**: 272–275. [30. XII. 1959.]

## 1960

78. Notes and descriptions of the Carabidae from Mt. Hiko and its vicinity (Coleoptera). *Esakia, Hikosan*, (2): 3–6. [20. II. 1960.]
79. A revision of the Chalcididae (Hymenoptera) of Japan, with descriptions of sixteen new species. *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (11): 131–363. [20. II. 1960.]
80. On a new *Bembidion*-species from Mts. Iide (Coleoptera, Carabidae). *Kontyû, Tokyo*, **28**: 34–36. [Co-authored with K. BABA; 31. III. 1960.]
81. A new species of *Patrobus* from Mts. Iide, with the key to the *Patrobus*-species of Japan (Coleoptera, Carabidae). *Akitu, Kyoto*, **9**: 1–10. [Co-authored with K. BABA; 1. VII. 1960.]
82. One new species of *Oodes* from Niigata Prefecture, Japan (Coleoptera, Carabidae). *Akitu, Kyoto*, **9**: 31–33. [Co-authored with K. BABA; 1. X. 1960.]
83. *Calleida*-species of Japan (Coleoptera, Carabidae). *Bull. natn. Inst. agric. Sci. (Japan)*, (C), (12): 155–169. [10. XI. 1960.]
84. A new subspecies of *Pterostichus macrogenys* BATES from Niigata Prefecture, Japan. *Akitu, Kyoto*, **9**: 62. [Co-authored with K. BABA; 1. XII. 1960.]

## 1961

85. One new species of *Trephionus* from Yashima, Shikoku, Japan (Coleoptera, Carabidae). *Niponius, Takamatsu*, **1**(10): 1–4. [3. III. 1961.]
86. Family Carabidae, in CHÛJÔ, M.: Coleoptera from Southeast Asia. *Nature and Life in Southeast Asia*, **1**: 265–300. [25. III. 1961.]
87. Revised key to the *Coptodera*-species of Japan. *Ent. Rev. Japan, Osaka*, **12**: 45–46, pl. 8. (In Japanese, with English title.) [28. IV. 1961.]
