

About the “In Memoriam”

Dr. Kazuyoshi KUROSA, who passed away at the age of 97 on January 18, 2019, was not only a prominent researcher of the life histories of poisonous beetles, but also left many works on the taxonomic studies of parasitic acari on beetles. I would like to extend my sincerest condolences on his passing. With the permission of President Masahiro ÔHARA and Editor Hiraku YOSHITAKE, I was in charge of editing this memorial frame. I greatly thank Yoshiro KUROSA who wrote a memorial article for his father. My thanks are also due to all authors who submitted memorial papers.
