

## A New Record of *Stroheckeria quadrimaculata* (Coleoptera, Endomychidae, Lycoperdininae) from Laos

Hiroyuki YOSHITOMI and Koichi SOGOH

Entomological Laboratory, Faculty of Agriculture, Ehime University, Tarumi 3–5–7, Matsuyama, 790–8566 Japan

Lycoperdininae is the largest group of the family Endomychidae, and includes 43 genera (CHANG & REN, 2013; TOMASZEWSKA & SZAWARYN, 2013). The *Amphisternus* group (sensu TOMASZEWSKA, 2005, 2006) within Lycoperdininae is a monophyletic genus group, containing ten Oriental genera: *Amphisternus* GERMAR, *Amphistethus* STROHECKER, *Brachytrycherus* ARROW, *Cacodaemon* THOMSON, *Gerstaeckerus* TOMASZEWSKA, *Humerus* CHANG et REN, *Ohtaius* CHŪJŌ, *Spathomeles* GERSTAECKER, *Stictomela* GORHAM, and *Stroheckeria* TOMASZEWSKA.

*Stroheckeria* TOMASZEWSKA, 2006 is a monotypic genus whose phylogenetic position is uncertain (TOMASZEWSKA, 2006). The type species, *Stroheckeria quadrimaculata* TOMASZEWSKA, 2006, was described based on two specimens from Tam Dao, Vietnam, and no additional information has been reported (SHOCKLEY *et al.*, 2009). We report this species from Laos for the first time as follows.

### *Stroheckeria quadrimaculata* TOMASZEWSKA, 2006

(Fig. 1)

*Stroheckeria quadrimaculata* TOMASZEWSKA, 2006: 466.

*Specimens examined.* 1 female, “[LAOS] Ban Saleui Xam Neua 30-31.III.2005 J. Yamasako leg.”; 1 female, “[LAOS] Nong Het Xiang Khoang 24.VI.2006 J. Yamasako leg.”; 1 female, “LAOS Nong het Xieng Khuang Prov. 5.IV, 2007 N. Ohbayashi leg.”

Fig. 1. *Stroheckeria quadrimaculata* TOMASZEWSKA, 2006. Scale bar = 1.00 mm.

*Distribution.* Vietnam, Laos.
