

The First Record of *Callistopopillia davidis* (FAIRMAIRE) (Coleoptera, Scarabaeidae, Rutelinae) from Laos and Vietnam

Naoki KANEKO

Laboratory of Entomology, Tokyo University of Agriculture, 1737 Funako, Atsugi, Kanagawa, 243–0034 Japan

To date, the scarabaeid beetle *Callistopopillia davidis* (FAIRMAIRE, 1878) (Rutelinae, Anomalini, Popilliina) has been known to occur in central and southern China (Guangxi, Guizhou, Hubei, Sichuan, and Yunnan Provinces) (ZORN & BEZDĚK, 2016). During investigation of scarabaeid beetles housed in the insect collection of Tokyo University of Agriculture, recently, I found four specimens of the species collected from Laos and Vietnam. I report here *C. davidis* as the first record from Laos and Vietnam.

All the examined specimens are preserved in the Laboratory of Entomology, Tokyo University of Agriculture, Atsugi, Kanagawa, Japan. I thank Tadashi ISHIKAWA for reviewing the manuscript, and to Kenta TSUJII and Kentarō OKAJIMA for kindly offering material.

Callistopopillia davidis (FAIRMAIRE, 1878)

Callistethus davidis FAIRMAIRE, 1878: 101 (type locality: China).

Callistopopillia davidis: OHAUS, 1903: 221.

Callistethus compressidens FAIRMAIRE, 1887: 112 (synonymized by OHAUS, 1903).

Fig. 1. Dorsal habitus of *Callistopopillia davidis* (FAIRMAIRE).

Specimens examined. [Laos] 2 exs., Mt. Pan, Sam Neua, VI.2013, native collector leg.; 1 ex., Mt. Phou Samsoum, Xieng Khouang Prov., 23.V.2013, K. TSUJII leg. [Vietnam] 1 ex., Sa Pa, 1,900 m, 6.III.2000, K. OKAJI-MA leg.

Distribution. China (Guangxi, Guizhou, Hubei, Sichuan, and Yunnan); Laos and Vietnam — new record.
