To date, *Procirrus lewisii* SHARP, 1889 has been recorded from Japan, China (Hong Kong) and Thailand (HERMAN, 2010). In Japan, this species is known to be widely distributed in Honshu, the Izu Isls. (Izu-Ôshima Is.), the Ogasawara Isls. (Haha-jima Is.), Shikoku, Kyushu, Tsushima Is., and the Ryukyus (Kuchinoerabu-jima Is., Tokunoshima Is., and Ishigaki-jima Is.) (FUJIMOTO, 2011; SENDA, 2020), but no distributional information of this species is presented from Yonaguni-jima Is. of the Ryukyus. In this paper, we newly record it from there based on the specimen collected by the second author. The specimen is preserved in the Ishikawa Insect Museum, Hakusan-shi, Ishikawa Prefecture. We thank Dr. Hiroyuki YOSHITOMI (Ehime University Museum, Matsuyama) for reviewing the draft of this paper.

Specimen examined. 1 ♂ (Fig. 1), Tarumai, Yonaguni-chô, Yonaguni-jima Is., Japan, 17.VI.2018, K. WATANABE leg.

Distribution. Japan: Honshu, Izu Isls. (Izu-Ôshima Is.), Ogasawara Isls. (Haha-jima Is.), Shikoku, Kyushu, Tsushima Is., and the Ryukyus (Kuchinoerabu-jima Is., Tokunoshima Is., and Ishigaki-jima Is.; Yonaguni-jima Is. — new record); China (Hong Kong); Thailand.
