*Copris arimotoi* was originally described from Sumatera Barat Province, Sumatra, Indonesia (OCHI & ARAYA, 1992) and has been known from only there. In 2013, I collected a male specimen of *Copris arimotoi* in Perak State, Malaysia. This is the first record of this species from Peninsular Malaysia. Its collecting data is: 1 ♂, Gerik, 1,100 m alt., Perak State, Malaysia, 8-III-2013, S. KAKIZOE leg.

*Distribution.* Sumatra, Peninsular Malaysia (new record).

I wish to thank Mr. Tomotaka DOI (Okinawa, Japan) for his help in my field survey; Dr. Teruo OCHI (Osaka, Japan) for identification of *C. arimotoi* and giving invaluable information; and Dr. Munetoshi MARUYAMA (Kyushu University) for reviewing the manuscript.

This study was supported in part by a financial incentive of Kyushu University Foundation Yamakawa Prize.
