## Additional Records of Weevils New to the Fauna of Kôzushima Island, the Izu Islands, Japan (Coleoptera, Curculionoidea)

**Hiroaki KOJIMA, Chennan ZHANG and Seishi OBATA**

Laboratory of Entomology, Tokyo University of Agriculture,  
1737 Funako, Atsugi, Kanagawa, 243–0034 Japan

In addition to the recent reports on the weevil fauna of Kôzushima Is., Tokyo (KOJIMA, 2011; YOSHITAKE, 2012), following 16 species are added to the fauna of the islands based upon a recent survey and the collection preserved in the Laboratory of Entomology, Tokyo University of Agriculture. Accordingly, a total of 63 species of weevils excluding Scolytidae and Platypodidae are recognized from the island. Collector names are abbreviated as follows: TH: Taturô HANATANI; HK: Hiroaki KOJIMA; HS: Hiromasa SAWADA.

The authors thank Dr. Yasuaki WATANABE for his kind help and encouragement. The recent survey was conducted under permission of the village office. This study was supported by KAKENHI (24510333).
