<sup>2)</sup> No. 145-7, Dulan, Donghe Township, Taitung County, 95941 Taiwan

A xylorhizine species incertae sedis has been recorded from Taiwan (CHOU, 2004, 2008; NAKAMURA *et al.*, 2014) on the basis of a single specimen illustrated as *Thylactus* sp. in CHOU (*op. cit.*). According to our careful examination, this undetermined species in question was identical with *T. chinensis* KRIESCHE, 1924, which was originally described from Canton, China. We therefore newly record *T. chinensis* from Taiwan herein.

Before going further, we would like to thank Nobuo OHBAYASHI (Miura, Japan) for the useful comments on improving this manuscript.

### *Thylactus chinensis* KRIESCHE, 1924

*Thylactus chinensis* KRIESCHE, 1924, Deuts. ent. Zs., **1924**: 289.

*Thylactus angustatus* PIC, 1925, Mél. Exot. Ent., **43**: 24.

*Thylactus* sp.: CHOU, 2004 & 2008, Atl. Taiwan Cerambyc.: 379. — NAKAMURA *et al.*, 2014, Misc. Rep. Hiwa Mus. nat. Hist., **55**: 150.

*Specimen examined.* 1 ♂, Fu-shan, Wulai District, New Taipei City, 11-X-1997, Y.-R. LIN leg. (CHOU Coll., figured in CHOU, 2004 & 2008: 379).

*Distribution.* Southwest China, North Vietnam and Taiwan (new record).
