Further Records of Weevils New to the Fauna of Izu-Ôshima Island, the Izu Islands, Japan (Coleoptera, Curculionoidea)

Hiroaki KOJIMA, Chennan ZHANG and Yûki SHIMIZU

Laboratory of Entomology, Tokyo University of Agriculture,
1737 Funako, Atsugi, Kanagawa, 243-0034 Japan

In addition to the recent reports on the weevil fauna of the Izu-Ôshima Is., Tokyo (KOJIMA & FUJISAWA, 2011; KOJIMA, 2012), following ten species including two species new to the Izu Islands are added to the fauna based on a recent short survey. Resultingly, a total of 78 species of weevils excluding Scolytidae and Platypodiidae are recognized from the island. Collector names are abbreviated as follows: CZ: Chennan ZHANG, HK: Hiroaki KOJIMA and YS: Yûki SHIMIZU. This study was supported by KAKENHI (24510333).

Anthribidae

1. *Phaulimia aberrans* (SHARP, 1891)
1 ex., Gojinka Sky Line, 9-VI-2013, HK; 1 ex., Miharayama-tozandôro, 10-VI-2013, HK.

Dryophthoridae

2. *Aplotes roelofsi* (CHEVROLAT, 1882)
1 ex., Mt. Atagoyama, 9-VI-2013, HK.

Curculionidae

3. *Lepidepistomodes kokurohoshi* KOJIMA et MORIMOTO, 2006
29 exs., Mt. Atagoyama, 9 to 10–VI–2013, HK (on leaves of *Castanopsis sieboldii*). New to the Izu Islands.
4. *Dermatoxenus caesicollis* (GYLLENHAL, 1833)
1 ex., Gojinka Sky Line, 9–VI–2013, HK.
5. *Sitona japonicus* ROELOFS, 1873
1 ex., Nodahama, 10–VI–2012, HK.
6. *Ochyromera japonica* (ROELOFS, 1874)
24 exs., Gojinka Sky Line, 9–VI–2013, HK (on *Podocarpus macrophyllus*).
7. *Scleropteroides hypocrita* (HUSTACHE, 1916)
4 exs., Gojinka Sky Line, 9–VI–2013, HK.
8. *Phrissoderes rufitarsis* (ROELOFS, 1875)
1 ex., Rindô Nomashi-sen, 10–VI–2013, CZ. New to the Izu Islands.
9. *Colobodellus postfasciatus* MORIMOTO et MIYAKAWA, 1985
1 ex., Ômiya-jinja, 13–IX–2012, YS (by shifting litter).
10. *Colobodes ornatoides* MORIMOTO, 1988
1 ex., Uminofurusato Camp Site, 13–IX–2012, YS; 1 ex., Ômiya-jinja, 13–IX–2012, YS (by shifting litter).
