

Distributional Records of *Merionoeda baoshana* CHIANG (Coleoptera, Cerambycidae)

Tatsuya NIISATO¹⁾ and Yaheita YOKOI²⁾

¹⁾Bioindicator Co., Ltd., Nikkô-Kagurazaka Building, Iwato-chô 18, Shinjuku, Tokyo, 162-0832 Japan

²⁾Beerenkothen 33, 40882 Ratingen, Germany

Merionoeda baoshana CHIANG, 1963 was originally described from Baoshan, Yunnan Province of China and has so far been known from Yunnan and Laos (NIISATO & LIN, 2013). We examined the additional specimens of this species from Laos, Thailand and Myanmar, of which the latter two are new countries of record. We thanks Dr. Takasi KURIHARA, Messrs. Kaoru SAKAI and Hiroyuki WAKAHARA for their kind offer of materials used in the present examination.

Merionoeda (Macromolorchus) baoshana CHIANG, 1963

Merionoeda (Holangus) baoshana CHIANG, 1963: 66, 73, fig. 4; type locality: China, Yunnan, Baoshan.

Merionoeda (Macromolorchus) aglaospadix GRESSITT & RONDON, 1970: 118, fig. 21k; type locality: Phou Khao Khoay, 1050 m, Vientiane Prov., Laos.

Specimens examined. LAOS: 1 ♂, 1 ♀, Xieng Khouang Prov. (No detail data), V.1995, Local collector leg.; 3 ♂♂, same locality and collector as the preceding, VI.1997; 1 ♀, Phou Pan, Houa Phan Prov., 25.V.2002, H. WAKAHARA leg. THAILAND: 1 ♀, Nan Prov. (No detail data), VI.1992, Local collector leg. MYANMAR: 1 ♂, Hong-Khak Town, Shan Highland, 1-22.V.2005, Local collector leg.

Distribution. China: Yunnan; Laos; Thailand (new record); Myanmar (new record).
