

## **Additional Record of Weevils (Coleoptera, Curculionoidea) New to the Fauna of Niijima and Shikine-jima Isls., the Izu Islands, Japan**

**Hiroaki KOJIMA and Yûsuke FUJISAWA**

Laboratory of Entomology, Tokyo University of Agriculture,  
1737 Funako, Atsugi, Kanagawa, 243–0034 Japan

The following weevils have been newly added or confirmed to the fauna of Niijima and Shikine-jima Isls., the Izu Islands, Tokyo after KOJIMA and ZHANG (2012). All the specimens were collected by the authors, and are preserved in the Laboratory of Entomology, Tokyo University of Agriculture, Atsugi. The following abbreviations are used for collector names in the text: HK — Hiroaki KOJIMA and YF — Yûsuke FUJISAWA. This study was supported by the JSPS KAKENHI (Nos. 24510333 & 15K06937).

### **Niijima Island**

#### **Family Curculionidae**

1. *Curculio hilgendorfi* (HAROLD, 1878)  
7 exs., Mt. Tangoyama, 8.X.2014; 3 exs., Mt. Miyatsukayama, 8.X.2014.

2. *Dendrobaris insularis* (MORIMOTO et MIYAKAWA, 1985)  
3 exs., Mt. Miyatsukayama, 8.X.2014.

Although this species was recorded from Niijima Is. in the list of their paper (p. 29) under the name of *Acythopeus insularis*, no specimen from the island was included in the original description of type series (p. 41; MORIMOTO & MIYAKAWA, 1985). Later, HIRANO *et al.* (1993) recorded *Baris flavosignatus* ROELOFS, 1879, now assigned to the genus *Dendrobaris* EGOROV, 1976, from Niijima Is., which however might be a misidentification of *D. insularis*. Occurrence of this species is herein confirmed from the island.

3. *Acicnemis maculaalba* ROELOFS, 1875  
1 ex., Mt. Azuchiyama, 12.VII.2014; 1 ex., Mukaiyama-rindô, 8.X.2014.

### **Shikine-jima Island**

#### **Family Anthribidae**

1. *Valenfriesia tomicoides* (SHARP, 1891)  
2 exs., Mt. Gunjiyama–Ishijirogawa, 10.X.2014.

#### **Family Dryophthoridae**

2. *Dryophthorus sculpturatus* (WOLLASTON, 1873)  
1 ex., nr. Jinata-onsen, 3.XI.2016, YF.

Family **Curculionidae**

3. *Curculio hilgendorfi* (HAROLD, 1878)  
1 ex., nr. Jinata-onsen, 10–11.X.2014.
4. *Shirahoshizo rufescens* (ROELOFS, 1875)  
3 exs., nr. Jinata-onsen, 10–11.X.2014.
5. *Shirahoshizo insidiosus* (ROELOFS, 1875)  
3 exs., nr. Jinata-onsen, 10–11.X.2014.
6. *Macrorhyncholus crassiusculus* WOLLASTON, 1873  
1 ex., nr. Tōjinzushiro, 4.XI.2016, YF.
